

IAM - Identity and access management.

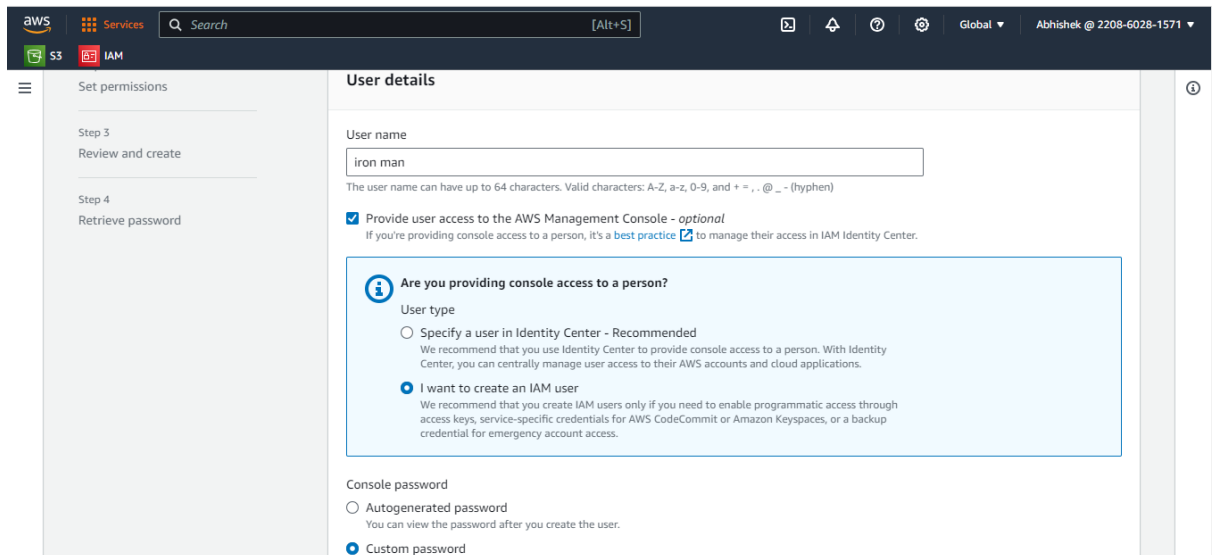

(It is a one type of webservice that helps you securely control access to aws resources).

1. We can add user.

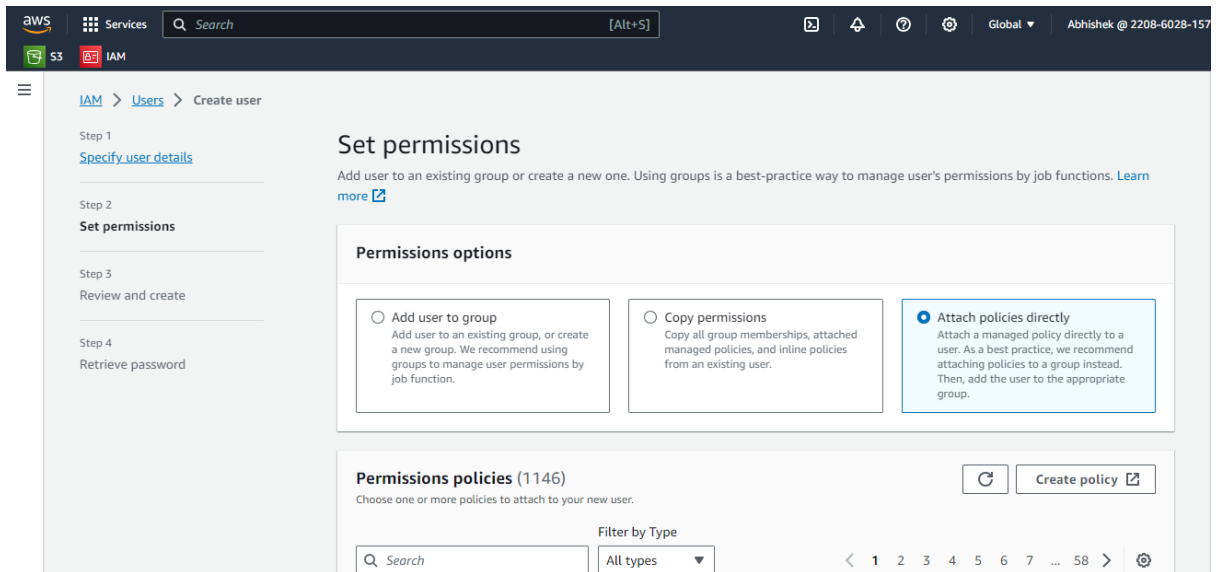

Click on create user > give username

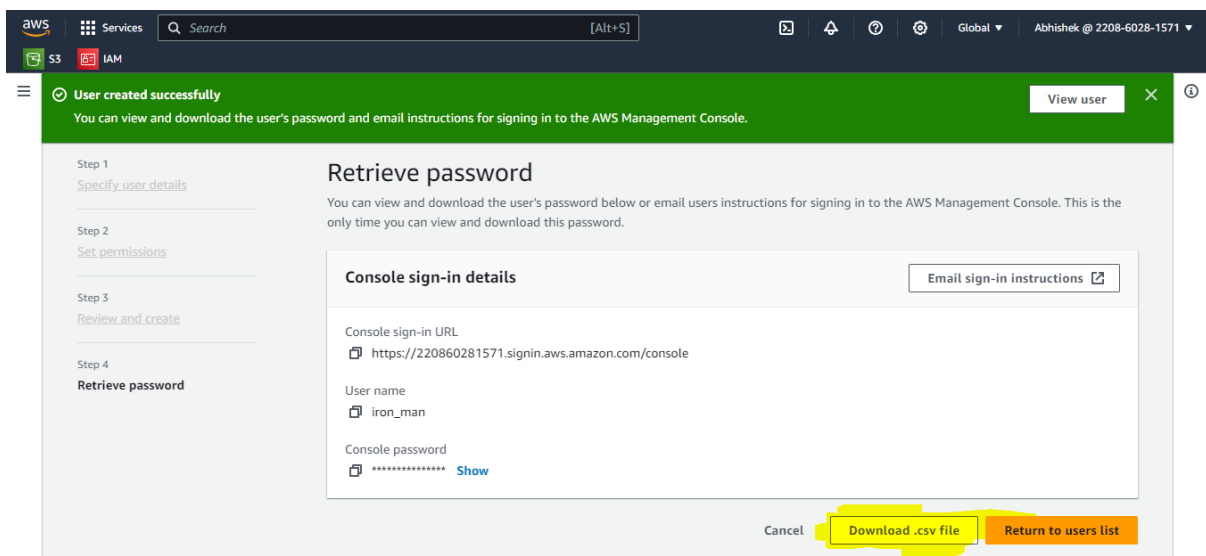

2. Fills the user details and click on create user.

3. Set the permissions.

4. Then you can perform step 4
5. Also you can download .csv file in that file created user details are stored.

6. Now you can check, user is created.

aws Services Search [Alt+S] Global Abhishek @ 2208-6028-157

S3 IAM

Identity and Access Management (IAM)

Search IAM

Dashboard

▼ Access management

- User groups
- Users**
- Roles
- Policies
- Identity providers
- Account settings

▼ Access reports

- Access analyzer
- Archive rules

User created successfully

You can view and download the user's password and email instructions for signing in to the AWS Management Console. [View user](#)

[IAM](#) > Users

Users (4) [Info](#) [Refresh](#) [Delete](#) [Create user](#)

An IAM user is an identity with long-term credentials that is used to interact with AWS in an account.

Search

<input type="checkbox"/>	User name	Path	Group	Last activity	MFA	Password age
<input type="checkbox"/>	Abhishek	/	0	C	-	✓ 3 days
<input type="checkbox"/>	Admin	/	0	C	-	⚠ 123 days
<input type="checkbox"/>	iron_man	/	0	C	-	-
<input type="checkbox"/>	Mayur	/	0	C	-	✓ 75 days

7. Now iron man user can login and perform the operations.
